

Table 3.3.1.1-9

Associate of Applied Science in Logistics and Supply Chain Management		
2013-2014 Outcomes	2014-2015 Outcomes	2015-2016 Outcomes
<p>Learning Outcome: Demonstrate logistics skills in real world working environment.</p> <p>88% of students made a C or better on the evaluation.</p>	<p>Learning Outcome: Demonstrate logistics skills in real world working environment.</p> <p>100% of students made a "C" or better on this evaluation.</p>	<p>Learning Outcome: Demonstrate logistics skills in real world working environment.</p> <p>100% of students made a "C" or better on this evaluation.</p>
<p>Learning Outcome: Describe management's role in the delivery of logistics.</p> <p>70% of the students made a "C" or better on the Case Study questions.</p>	<p>Learning Outcome: Describe management's role in the delivery of logistics.</p> <p>94% of students made a "C" or better on Case Study questions.</p>	<p>Learning Outcome: Describe management's role in the delivery of logistics.</p> <p>89% of students made a "C" or better on Case Study questions.</p>
<p>Learning Outcome: Discuss total supply chain management and its function in the physical distribution system.</p> <p>71% of students in made a "C" or better on the final case study.</p>	<p>Learning Outcome: Discuss total supply chain management and its function in the physical distribution system.</p> <p>69% of students made a "C" or better on the final case study. Objective not met.</p>	<p>Learning Outcome: Discuss total supply chain management and its function in the physical distribution system.</p> <p>80% of students made a "C" or better on the final case study.</p>
2013-2014 Improvements	2014-2105 Improvements	2015-2016 Improvements
<p>Develop or identify key assignment to address Critical Thinking and Communication skills in LMGT 2388</p>	<p>Add transportation software to be used by students in the Logistics program.</p>	<p>Additional case study development and evaluation problems will be presented during the transportation course for the program.</p>

2013-2014 Outcomes	2014-2015 Outcomes	2015-2016 Outcomes
<p>Competition in a National Logistics Competition in January of 2013 was successful and will be continued. More focus needs to be placed on the rubrics and requirements for the case study. Develop a tutorial program for entry level students.</p> <p>Videos should be available for online students. Faculty will be given more guidance in this area and greater access to video resources.</p>	<p>Continue to refine key assignments addressing communication and critical thinking skills; this should improve outcomes for all Logistics Program learning outcomes.</p>	<p>Acquire simulation software to strengthen critical thinking skills.</p> <p>Communication skills should be addressed throughout the program.</p>
